THANK YOU

Welcome home, little Eyes.

Thank you for choosing Eyes. It’s a small desk companion with nothing to press. Plug it into any USB-C charger or computer and it wakes up on its own. It looks around, naps now and then, and sometimes says a quiet word.

MAKE IT YOURS

1. **Plug Eyes into a computer** with a USB-C cable.
2. **Open the page below in Chrome or Edge.**
   On a computer. Phones, tablets, Safari and Firefox can’t connect.
3. **Press Connect** and pick your Eyes from the list.
4. **Change anything you like, then press Save.**
   If you unplug without saving, it keeps its previous settings.

WHAT YOU CAN CHANGE

- A greeting with **your name** when it powers up
- Up to 30 **messages of your own**, shown in order or at random
- Seven **eye styles**, including hearts
- **Light colour** and seven light shows
- Text size, **words-only screen** and a clock

★★★★★ **Has Eyes made you smile?**

Please tell others with a review on Etsy. I design and hand-build every one myself, and each review helps my little shop get found — so I can keep dreaming up new, curious gadgets. A line or two is plenty, and a photo of Eyes on your desk would make my day.

Enjoy your new companion,
Handwired Labs

To put it back how it arrived, press **Reset to defaults**, then **Save**. Your settings and words stay on your Eyes and are never sent to us.
